Vol. 6 No. 13, June 28-July 31, 1980

The Administration on Aging has awarded UCSF an $800,000 four-year grant to establish a National Aging Health Policy Center dedicated to the special health and social problems of older Americans.

The only one of its kind in the country, the National Center will be organized as a multi-disciplinary, multi-functional research, educational, and public service resource of the School of Nursing and the School of Medicine's Medical Anthropology and Health Policy programs.

The initial work of the Center will be an extension of research and analysis programs already being carried out at UCSF.

Carroll L. Estes, professor, Social and Behavioral Sciences and director, School of Nursing Aging Center, is the principal investigator. Principal co-investigators are Philip R. Lee, director, Health Policy Program, and M. Margaret Clark, professor and chairman, Medical Anthropology program.

A grant of more than $1.8 million has been awarded to UCSF scientists by the National Institute of Child Health and Human Development to learn more about the causes of premature birth, develop better approaches to its prevention, and improve methods of delivering premature babies.

The primary focus of the medical investigation is on the endocrine, immune, and infectious mechanisms involved in premature birth, according to principal investigator Robert Creasy, and Pentti Siiteri, who will direct many of the endocrinological aspects. Both are professors in Obstetrics, Gynecology, and Reproductive Sciences. Creasy is also an associate member of the Cardiovascular Research Institute.

Seven distinct but related clinical and basic studies, involving 12 UCSF and SFGH faculty investigators, will be carried out with the five-year federal grant.

Among the research projects supported by the new grant:

- Some 1600 Bay Area women at high risk to deliver prematurely are expected to participate. Blood samples will be taken weekly throughout their pregnancies and analyzed for changes in the balance of the hormones estrogen and progesterone.
- An immunologist will explore the hypothesis that preterm birth may be due to failure of one or more of the body's immunologic mechanisms to protect the fetus and/or placenta.
- The first extensive study to determine if infection in the mother's uterus may play a part in premature birth will be conducted.
- Studies of hormonal changes in pregnant laboratory animals will be correlated with what is learned from studies of people.

NEWS BRIEFS

Three special awards recognizing major contributions to the clinical programs of the UCSF hospitals & clinics and the School of Medicine were presented at the annual meeting of the UCSF medical staff in June.

A crystal bear on a black base with a silver plaque was awarded to Julius H. Comroe, Jr., director emeritus, Cardiovascular Research Institute and professor emeritus, Physiology; Maurice Galante, professor, Surgery, Oral Surgery and Oral Biology; and the UCSF Hospitals Auxiliary, represented by Elizabeth Martinez, new president of the Board of Directors.

Awards presented to the graduating residents in Psychiatry at LPPI's graduation in July went to:

- William A. Dickman, the Henry F. Albronda Memorial Award, "for exceptional psychotherapeutic skill and unusual concern for the welfare of patients;"
- Samuel Rabison, the Alexander Simon Award, "for investment and excellence in teaching;"
- Robert C. Fusco and Ronnie Sue Leith, honorable mention for the Simon Award;
- Robert Larsen, third-year resident in Psychiatry, the Award for Creative Achievement "for an outstanding achievement by a psychiatric resident;"
- Jane Hewitt and Amanda Hamilton, Doctor of Mental Health candidates, Outstanding Clinical Knowledge and Skills Award, and the Outstanding Work in Community Mental Health Award, respectively;
- Robert G. Ley, clinical psychology fellow, the R.E. Harris Memorial Award "for outstanding fellow in clinical psychology;"
- Craig Van Dyke, associate professor, Psychiatry (full-time faculty) and Irwin Gootnick, assistant clinical professor, Psychiatry (clinical faculty), the LPPI Residents' Association Award "for excellence in and commitment to the education of residents in Psychiatry."

The Bowl of Hygeia, the highest award of the School of Pharmacy, was given to Manuel Saltiel during commencement in June. The award goes to the graduate "who best demonstrates the qualities and ideals of pharmacists." Akiko Kasuya and Stephen Paul Wenger were cited for honorable mention.

Seven of the School's outstanding teachers received certificates and a total of $4000 in cash prizes from the Joseph M. Long Foundation of Walnut Creek at the School's annual awards ceremony.

The 1980 Long Award recipients are: Martin D. Shetlar, associate professor, Chemistry and Pharmaceutical Chemistry; Steven L. Barriere, assistant clinical professor, Pharmacy and coordinator for the Antibiotic Control Program; Sexton D. Sutherland, lecturer, Department of Anatomy; Darryl S. Inaba, assistant clinical professor, Pharmacy; Maria A. Shemantine, resident, Pharmacy; Bernie Silber, teaching assistant, Physical Pharmacy; and Corrinne G. Wong, teaching assistant, Organic Chemistry Laboratory.

The Long Awards, presented in recognition of full-time and volunteer faculty and teaching assistants' outstanding work with students, was established by Long, a benefactor of the campus, whose donations have helped modernize Moffitt Hospital and establish the Joseph M. Long Hospital.

Awards also were presented to more than 80 outstanding students, including Jeffrey M. Blaney, Joe W. Keepers, Patrick K. Noonan, Mark A. Reynolds, Philip C. Smith, and Thomas F. Woolf — all graduate student winners of the American Foundation for Pharmaceutical Education fellowships.

Also, the National Institutes of Health Pharmacology Fellowship went to Bruce A. Mico, graduate student; and the University Scholarship went to Ethel Dayan, undergraduate student.

The School of Nursing's undergraduate class gave the Teacher of the Year Award to Elizabeth Ryan, lecturer in the Department of Nursing in Biological Dysfunction, School of Nursing, for her "outstanding inspiration and consistent dedication to student development," during the School's June commencement.

During the ceremony 140 of the graduates received the baccalaureate degree, and 162 the master's degree in nursing.

The third annual Millberry Union Children's Film Festival will be held during the summer on Fridays in Cole Hall. Each feature will have four shows — 10 a.m., 1:30, 6:30 and 8 p.m., in order to accommodate both day care centers and families. Group rates of 10 or more will be available at the 10 a.m. and 1:30 p.m. shows. To make a reservation call x2019.

The following Walt Disney classics are in the summer lineup: *Sleeping Beauty*, July 25; *The Jungle Book*, August 8; and *The Rescuers*, August 22. Admission for children under 14 is $1; UCSF students and Millberry Union members, $1.50; and general, $2. Group admission for children under 14 is $.75.

Call Millberry Union at x1800 to confirm show dates and obtain a free children's Summer Fun brochure.

The Habit Abatement Clinic of Langley Porter is now accepting applications from smokers between the ages of 18 to 55 to receive treatments designed to help stop smoking and become non-smokers permanently. There is no fee, however a $65 refundable deposit is required. Orientation meetings for the summer session will be held the week of July 21. Interested persons should contact Deborah Rugg, the Habit Abatement Clinic, x7-453.

The massage service at Millberry Union is expanding its hours starting July 14. Massage will be offered five days a week from 10 a.m. to 8 p.m., early morning appointments will be available Wednesdays from 8 a.m., and Shiatsu massages will be given on Tuesday evenings. In addition, the service will be open to the general public as well as to Millberry Union members, and the campus community.

Appointments can be made one week in advance. Fees are: Millberry Union members and students $12.50/hr., $7.50/half-hr.; UC employees $15/hr., $12.50/half-hr.; general $18/hr., $13/half-hr. For further information or appointments visit the Athletic Control Desk or call x1115.

The Office of Public Service Programs is in the process of updating a directory that summarizes the important public service contributions UCSF is making to the community. A survey is being mailed to deans, directors, and department chairpersons and other administrative officers that will provide an up-to-date summary of what the professional schools, departments and individuals are doing in the area of public service. After the directory is completed it will be provided to selected departments and offices on campus.

Public service programs is defined as all UCSF activity of an educational service or support nature that is directed to individuals and groups off campus and/or that take place off campus.

Completed surveys should be returned to the Office of Public Service Programs, 1355-Third Avenue, by Friday, July 18. For further information contact David Bracker, x3206.

Eric Owyang, chief pharmacist in Pharmaceutical Services and clinical professor in Clinical Pharmacy is retiring as of July 3.

Owyang, who received his BS from the School of Pharmacy in 1941, was named Hospital Pharmacist of the Year by the California Society of Hospital Pharmacists in 1977 in recognition of his important and long-standing contribution to the practice and profession of hospital pharmacy. He also won the Thomas N. Burbridge Public Service Award in 1978 in recognition of a "firm and longlasting commitment to his church, his community, to public service, and his involvement with students."

A member of the UCSF community for more than 37 years, Owyang will continue as a consultant in the Division of Clinical Pharmacy Externship Course.

Study models exploring the mechanics of movement made by Verne T. Inman, professor emeritus and former chairman of the Department of Orthopaedic Surgery, are currently on display in the main exhibit case outside the Library, second floor, Medical Sciences.

Inman, who died in February, was internationally known for his research on human locomotion and the development of prosthetic devices for the amputee. Inman established the Biomechanics Laboratory at UCSF in 1957, the first lab of its kind anywhere devoted to this discipline.
